Disposable Clog-Free Tip and Poole Suction

CAPABILITIES

Since 1987 SurgiMark has focused on one solution for basic surgical suction that replaces reusable instruments and eliminates inferior plastic disposables while reducing costs, consolidating inventory, and streamlining supply chain management.

- **One solution** for all Veterans Administration Medical Centers and Military Hospitals at home or in the field—land or sea.
- **Clog-Free** performance that is notably better than reusable suction instruments and improves work-flow.
- **Disposable** means always sterile and always clean, eliminating costly reprocessing that leads to unclean instruments that pose a risk of disease transmission and surgical site infection.

DIFFERENTIATORS

- **Patented** medical device unavailable elsewhere.
- **Dual function** reduces inventory by 50%.
- **Multiple distribution** including direct GSA/BPA.

PAST PERFORMANCE

Private Sector

- HCA Healthcare
- Ascension Health Systems
- Tenet Healthcare
- Baptist Health System
- Kaiser-Permanente

Government

- 25 VAMCs Nationwide
- Brooke Army MC
- Naval MC San Diego
- Travis AFB MC
